News - 12/06/2013

- Dr. Stan Bogdanov has published [Hacking Hot Potatoes: The Cookbook](#), available in paperback, PDF and ePub format. Check it out!
- A change to the user agent string in Firefox 17 results in Hot Potatoes and Quandary exercises showing an error message when loading in the browser. Version [6.3.0.5 \(Windows\)](#) of Hot Potatoes, [6.1.0.6 \(Java for Mac\)](#) of Hot Potatoes and version 2.4.2.1 of [Quandary](#) (Windows) have updated source files which fix the problem, but you will need to rebuild your exercise HTML pages to solve it. See the [Bugs and Updates](#) page for more information.
- Hot Potatoes is now freeware. The complete version of the programs is now available for free, from the [Downloads](#) section below. The free version of Hot Potatoes for Windows is version 6.3, and the Java version is 6.1.
- [Quandary](#), our other authoring tool for creating Web-based action mazes, is also now free.
- We no longer provide any technical support for Hot Potatoes or Quandary.

Dopo aver cliccato sul link mostrato nella slide precedente vi troverete in questa pagina...

scegliete il file a seconda del sistema operativo (Windows/Mac/Linux) e scaricate

Downloads

Download Hot Potatoes for Windows from here:

- [Hot Potatoes 6.3 installer](#) (Hot Potatoes for Windows 98/ME/NT4/2000/XP/Vista, version 6.3).
- [Hot Potatoes for Linux users running Wine](#) (version 6.3). This is a zip file containing the folder structure of the Windows version of Hot Potatoes. You can extract this to create the HotPot program folder without running the setup program if you prefer.

Download Java Hot Potatoes:

- [Download Java Hot Potatoes](#) which will run on Mac OS X, Windows, Linux or any computer running a Java Virtual Machine. To install and run Java Hot Potatoes on Mac OS X:
 1. Download the file javahotpot61.zip from the link above.
 2. Unzip that file on your computer, you will have a folder called JavaHotPot6.
 3. Drag the JavaHotPot6 folder to the Applications directory on your computer.
 4. Open the folder and double-click the JavaHotPotatoes6 application icon.
 5. Trash the javahotpot61.zip file.

**una volta scaricato il file di setup
l'installazione è del tutto intuitiva**
